

# NEXUS SOCKET

Introducing the NEXUS socket, the world first of its kind power socket that topple the traditional ways of installing light bulb. It is practical safe, no messy wires laying around and yet artistic - just light bulb and glass panel.

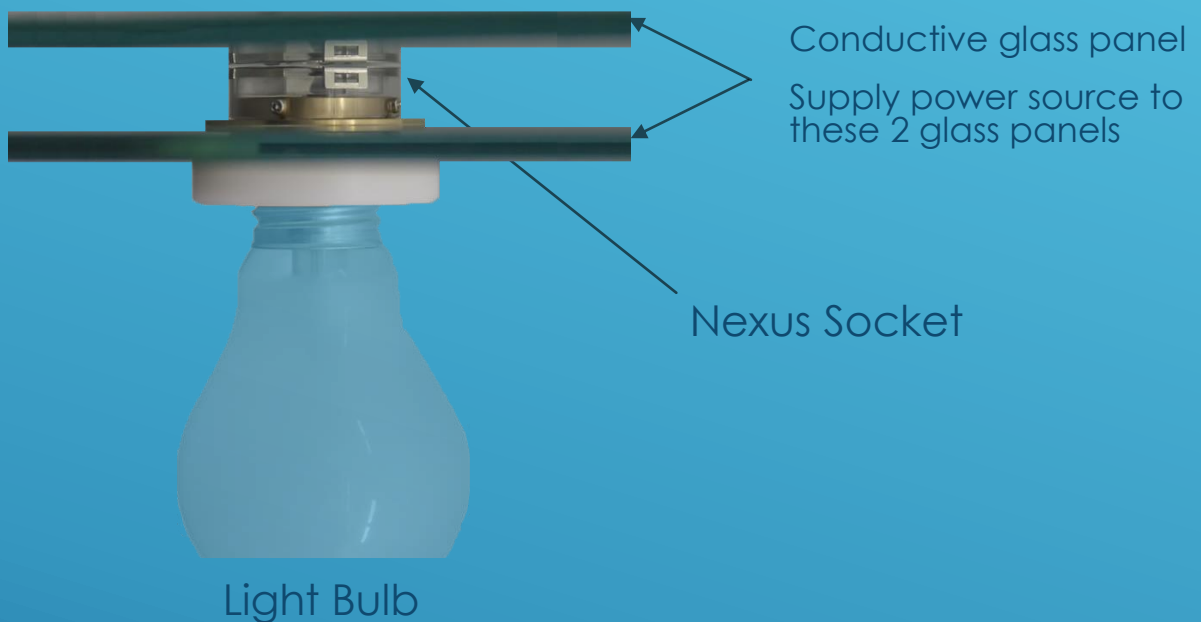

It's a Revolutionary patented design

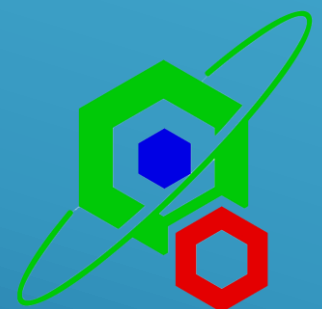

## How it works ?

Using conductive glass surface to acts as conductor to replace the traditional cables.

Coupled with this patented Nexus socket, it help to transmit the power source across the glass surface to the socket to turn on the light bulb.

Tested by SETSCO

## Applications:

- Ceiling Light
- Wall Feature Light
- Sky Light
- Table Light, etc...

## Technical Specifications:

Socket type: E27/E26

Contact Rating: 15A max.

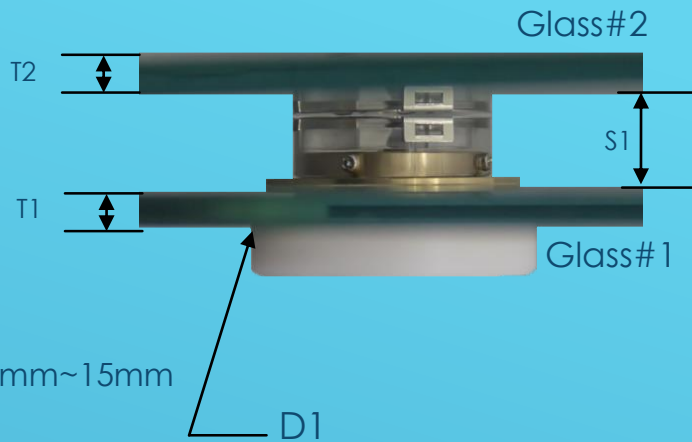

Glass cutout diameter (D1): 35~37mm

\*Glass#1 Thickness (T1): 6~12mm

\*Glass#2 Thickness (T2): 4~15mm

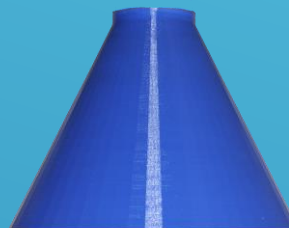

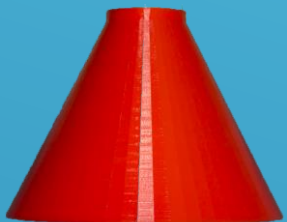

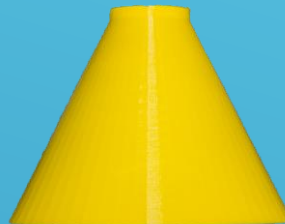

Spacing between 2 glass panels (S1): 12mm~15mm

\*Overall thickness of the Glass

## Changeable Shade

Besides using the standard insulator cap, user can customized their own personalized lamp shade to suits their theme.

## Product Ordering Code:

NEXUS-1-E27- XX

XX denotes:

01 – Insulator Cap – White Color (Standard)

02 – Insulator Cap – Black Color

03- Customised Shade, pls specify
